

## KYTC Web-based Pavement Design Program

### Quick Start Guide for Developing a New Pavement Design

1. Go to <http://kytcpavementdesign.engr.uky.edu/> and click REGISTER link. Create account and get a username and password. Register as a “Designer”.
2. Click LOGIN link in top right corner. Log-in with your User Name and Password.
3. Click NEW DESIGN link.
4. Fill in information under the TITLE & INFO and SUBGRADE tabs. All starred inputs are required before pavement design can be saved. Click Save.
5. Under AC and/or PCC Tab, review and if needed edit the recommended pavement designs.
6. Review information under COST ANALYSIS Tab, then go to DESIGN SELECTION & NOTES Tab and select Pavement type. This must be in accordance with the current [Pavement Type Selection Policy](#).
7. Select all applicable notes. Some notes are automatically selected, but the pavement designer should review all notes to ensure the correct ones are selected. Click SAVE.
8. Click SUBMIT. The Pavement Design will go to whoever was listed on the TITLE & INFO Tab as the Project Manager. If the Project Manager approves the design, it will then go to the Project Development Branch Manager for that District.
